

## **Clark County Genealogical Society Vancouver, WA**

### **Index to Family Histories & Files**

This index was created using catalog entries with a Dewey number of 929.2, which is used for family history. Some entries are books, microfiche and microfilm found on the library shelves, other entries relate to vertical files: a collection of donated research findings. Most vertical file entries have been digitized by CCGS in a searchable format.

The indexed resource can be found in the Clark County Genealogical Library. It is not available online.

This index contains the catalog number (also know as a user number) which can be looked up in Readerware. Readerware is the online catalog available in the CCGS library only. The catalog entry will provide additional information, including the location of the book or file.

Copies may not be used for any purpose other than private study, scholarship or research. Printed text may be searchable. Use Ctl+F to open a Search box. Due to the nature of Optical Character Recognition (OCR) and the quality of some printed items, some instances of the search term may not be found. It is always good practice to look for multiple spellings and to use other search terms. Handwritten text is not searchable.
